“Quantum Transport in Mesoscopic Systems”

CALL FOR PAPERS

Mesoscopic systems (i.e., between the size of a quantity of atoms and of materials in micrometer scale) are of abundant and charming physical

5) Theory and modeling of quantum transport properties in mesoscopic systems.

The issue attempts to collect the most advanced studies on cutting-edge issues of mesoscopic devices. We sincerely hope that this issue on Quantum Transport in Mesoscopic Systems can be beneficial for the broad audience of semiconducting physics.

GUEST EDITORS:

Prof. Yu Ye, Peking University, Beijing, China

Prof. Zheng Han, Institute of Metal Research, CAS, Shenyang, China

Manuscript Submission:

Manuscripts must be prepared according to Journal's guidelines, available at <http://iopscience.iop.org/journal/1674-4926>.

Submit your manuscripts via the online submission address at <https://mc03.manuscriptcentral.com/jos-iop>.

Please notify well in advance for your intention to submit a research paper.

Key timetable dates:

Manuscript due: **September 30, 2019**

Authors' notification: **October 31, 2019**

Publication date: **December**
